

Who Should Control Your Health & Your Home? A Corporation, or You? Your Health & Money Are at Stake!

Decide *for yourself* whether a risky technology is installed
on YOUR home or business.

Tell Your State Representative, "Pass HB 4916!"

Under the Analog Choice Bill, if you want a smart meter, you can have one. If you don't, this legislation ensures that homeowners and businesses can say no. **Some people cannot have a smart meter on their home: The health consequences are that severe!** Some Michigan residents are already **living without heat and electricity because the utility refuses to remove their smart meter** and replace it with the analog meter that has measured electricity for over a century. Call your legislator today. Go to our website for more information on smart meters.

On the back of this sheet, you can find your state representative and learn what to say to them to ensure your right to choice on this critical issue. **Hundreds of people are already speaking up! Join them!**

DTE and Consumers Energy have shut off people's power, including those who are elderly and in delicate health.

Consumers Energy had one person thrown in jail.

WE SHOULD HAVE A CHOICE ABOUT WHAT GOES ON OUR OWN HOME!

Smart electric meters are being installed on homes throughout Michigan. Smart (AMI) meters:

- **Will raise your electric rates** (peak pricing). (Rates in Oklahoma are already 10x normal at certain hours.)
- Are causing **severe health problems for many** people.
- Are forcing some Michigan residents to **live without heat and electricity**.
- Will have **long-term health consequences** for nearly everyone.
- Allow the utilities to **shut off your appliances at will** (smart-chipping).
- Allow the utilities to **sell your usage data** to the highest bidder. According to the utilities themselves, **the data will be worth more than the electricity they sell you**.
- Cause **appliance short-outs, flickering lights, and fires**.
- Allow the utility to shut off your power without coming to your home.

Call your state representative today and tell them that you want HB 4916 passed now! **Turn this page over to find your state rep and learn what to say.**

Please inform friends, relatives, co-workers, and urge them to take action now! Pass this flyer along!

Analog Choice Bill (HB 4916) Call Your State Representative. It Takes 2 Minutes!

Not sure who your state rep is? You can quickly find them by calling your library or by going to <http://house.michigan.gov/MHRPublic/>. (You are calling your *state* rep, not your *national* rep.)

You can also call your state senator. Find them at www.senate.michigan.gov/fysbyaddress.html.

Phone calls carry 100 times more weight than an email. Please **CALL** your rep. Your rep is here to represent you, and the aides who answer the phone are usually nice. So don't worry. You can call during business hours, or call in the evening or the weekend and leave a message. **The important thing is that you CALL!** If you really don't want to call, then please do email them. Tell the aide who answers that you wish to speak to your rep.

Always be polite and respectful to your representative. Tell your representative:

- Hello. My name is _____. I'm one of your constituents.
- I'm calling about HB 4916. I want a choice about whether to have a smart electric, gas, or water meter on my home.
- Tell them why you want customers to have a choice. Add anything else that is important to you about smart meters.

If the rep is not available, recite these points to the aide. If you want your representative to call you back, let the aide know. **Remember: You always have a right to speak with your representative—they represent you!**

EATON, JACKSON, LENAWEE COUNTIES

Tom Barrett (R) 71st District
(517) 373-0853
(most of Eaton County, including Grand Ledge, Charlotte, Pottersville, Lansing, Olivet)
